

IDH in Aceh

IDH supports collaborative landscape governance with the government, private sector, and civil society to boost production and realize sustainable agricultural business models. IDH implements a comprehensive and collaborative landscape approach strategy to achieve deforestation-free supply chains and improve community well-being.

In Aceh, IDH collaborates with stakeholders at both the provincial and district levels (Aceh Tamiang, Aceh Timur, Aceh Singkil, Subulussalam, and Aceh Utara).

4,70K ha
 the area of palm oil plantations in Aceh or around 9% of the total area of Aceh Province.

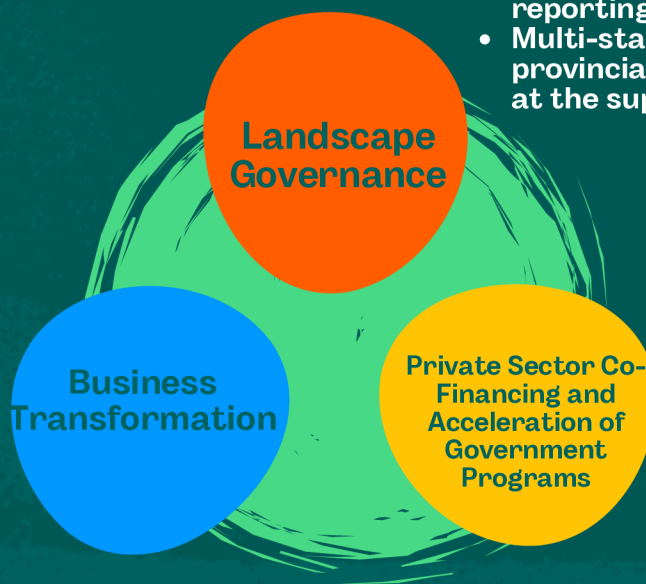

52%
 palm oil plantations are managed by around 250,000 smallholder farmers.

1.5 million people
 making palm oil a source of livelihood for more than 25% of the population of Aceh Province.

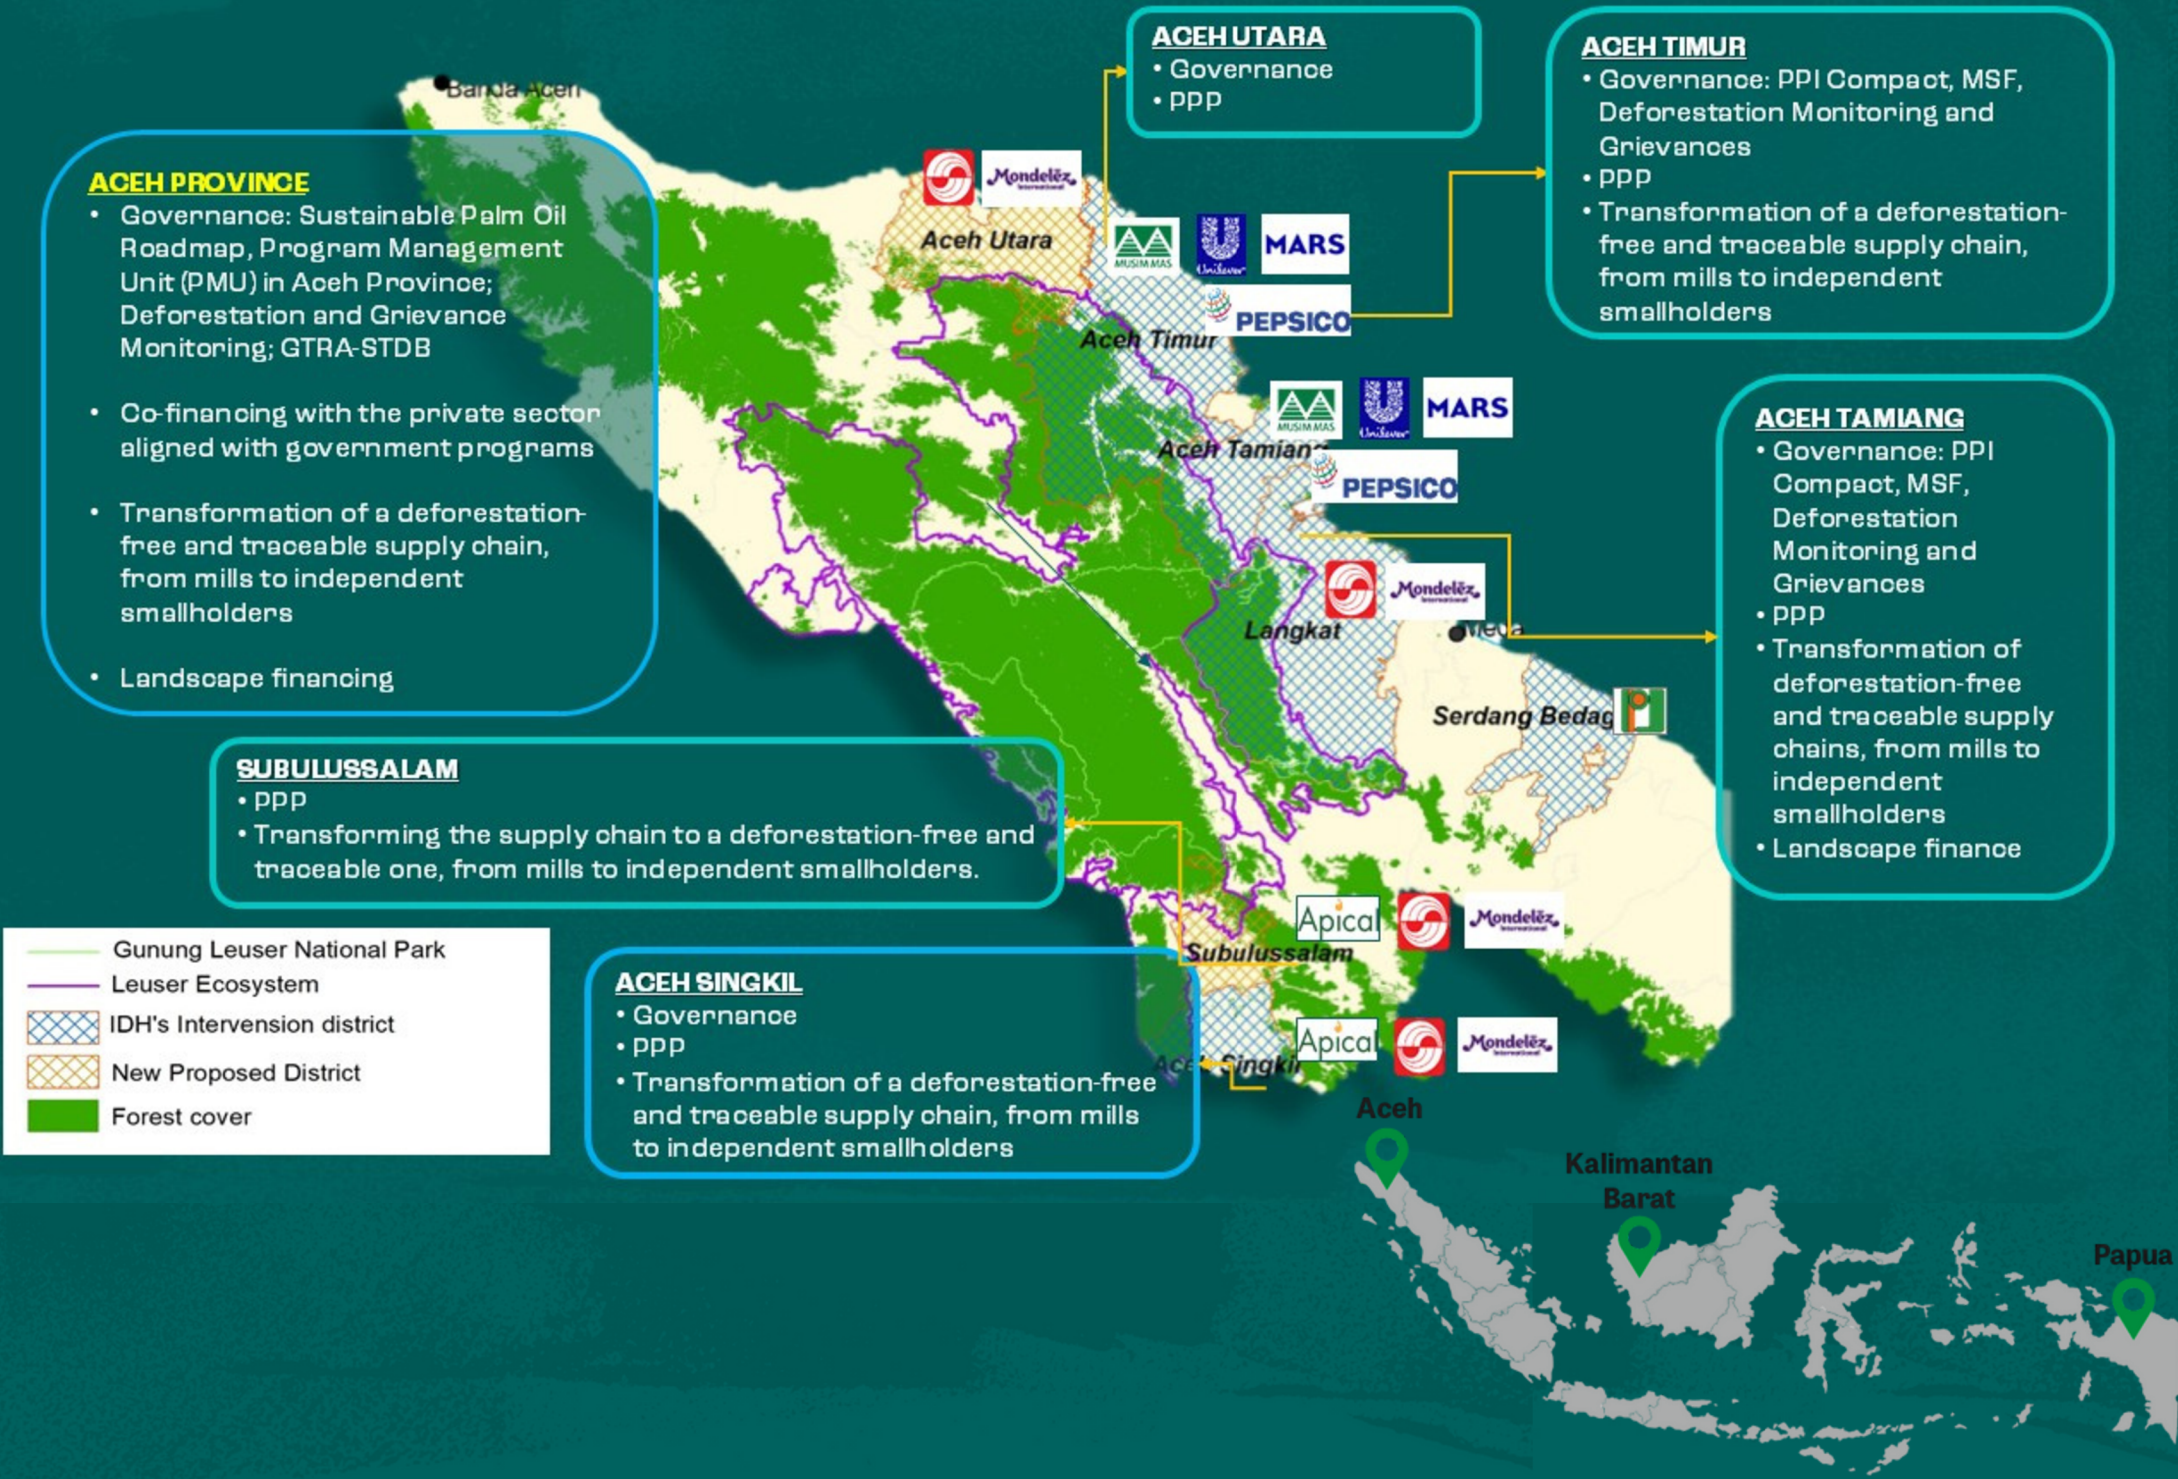

Activities

- New business models for palm oil concessions
- Traceability supporting the transformation of palm oil mills to zero deforestation
- Transforming independent smallholder production through improved sustainable practices

- HCS/HCV protection policy framework in production areas
- Monitoring and complaint reporting system
- Multi-stakeholder platform at the provincial level and PPI Compact at the supplier district level

- Public-private partnerships for the implementation of the PPI (Production, Protection, and Inclusion) plan.
- Synergy with government programs for independent smallholder farmers: land legality and basic services

ACEH PROVINCE

- Governance: Sustainable Palm Oil Roadmap, Program Management Unit (PMU) in Aceh Province; Deforestation and Grievance Monitoring; GTRA-STDB
- Co-financing with the private sector aligned with government programs
- Transformation of a deforestation-free and traceable supply chain, from mills to independent smallholders
- Landscape financing
